Initial Summary

Site is a land/water interface, perhaps land/water/structure interface, with a group of buildings of varying heights, dimensions & shapes, associated with vegetation, perhaps a "park or garden-like" or landscaped area. People are present, looks ~~like~~ strolling & working; site seems to be oriented ~~like~~ along something.

Niagara Falls

Structure is relatively tall, with several dimensional components, with a sense of "overlooking" or "panoramic vision". Seem to be white/grey in color, smooth, perhaps made of concrete, with glass windows.

Area is a place of interest with a structure of form, may interest which is tall, of larger diameter at top than at the bottom (similar to space needle). Top is accented by elevation + has 2-3 levels, one of which is open w/ panoramic view, carpeted, quiet furnished; other is open, possibly on roof, with the source of a observation platform --- Place seems to be a center of interest, planned, perhaps his horizon.
